Subject: No Pest Strips

Hi Guys -

Can you please get word out to your DMs to make sure stores do not use No Pest Strips. They're illegal to use in food establishments and toxic for both employees and my service techs.

Thank you

Hi Jill,

I'll call you around 10. Which stores had these in them?

I sent out the email to all the last time you asked, and I mentioned it during my leadership presentation to Ross and the RDs just last week.

I can have another talk with the team and stress the importance of breaking this habit.

Speak soon,

Thank you,

Rami Kranz

Rami -

My service mgr just sent me a pic of a DDVP strip that was placed in a flylight.

I myself came across 2 in the past 2 nights while inspecting under counter cabinets and we're inches from my face.

When you get a moment tomorrow if you could give me a call.

Thank you

Subject: 28168 flies and no pest strip

Hi Kim..it's Paul. Store had a few issues with flies in case. I was vacuuming the live and dead flies and saw that the pest strip was hidden under the bagels. The food in case is rotting. Meat and eggs in the case for days will cause fly breeding. Food needs to be changed more often and strips should never be placed there.
